Any reproduction or disclosure, whether as a copy or other form of duplication or use, is expressly prohibited without the prior consent of Titgemeyer GmbH & Co. KG.

### **Registered trademarks**

The trademarks BÖRTI, GETO, GETO therm, GETOVAN, GTO, LockBolt, MEGA PORT, plasti van, PLYFIX, POLYSTIC, press-ti, RIEKO, RIV-TI, ROLL-TO, TIBOLT, TIBULB, TIFAS, TILA, TIOS and Titgemeyer are registered trademarks and the intellectual property of Titgemeyer GmbH & Co. KG.

### **Term of Delivery and Payment**

All deliveries are carried out in compliance with our Terms of Delivery and Payment.

### **Limitation of liability**

All technical data, performance descriptions, drawings, illustrations, measurements, weights or any other performance data, recommendations and guidelines contained in this catalogue and relating to the installation of parts that we supply are only binding if so expressly agreed. Moreover, the user is obliged at all times to check each individual use and decide whether the components that we supply can be used as needed.

We accept liability in the case of wilful intent, gross negligence and infringement of cardinal contractual duties as well as for errors in respect of express or implied representations. Notwithstanding this, any claims for compensation not explicitly agreed to in these terms and conditions are hereby excluded in the case of customers who are not consumers and, in the case of such customers, who are not consumers, at all events limited to the damage foreseeable at the time of concluding the contract as well as to the value of the delivered consignment. To the extent that our liability is excluded or limited, this shall extend accordingly to the personal liability of employees, legal representatives and vicarious agents. In all instances of gross negligence committed by vicarious agents, we shall solely be liable to customers, who are not consumers, to compensate for typically foreseeable damage. The statutory regulation governing the burden of proof shall remain unaffected. The aforementioned limitation of liability shall not apply to claims resulting from product liability, for damage resulting from injury to life, limb or health, or for damage to privately used property.

**All technical specifications contained in this brochure are approximate and no guarantee is given as to their accuracy. Designs are subject to change.**

# TIFAS® blind rivets

## Benefits of blind rivet installation

More and more users are recognising and applying the positive benefits of working with blind rivets: for example, in electrical, medical and mechanical engineering, household appliances, power engineering, the toy and furniture industries, or even in the automotive sector and equipment manufacturing. Unlike welded joints, rivets can be quickly installed on one side and with little heat.

Even on hollow profiles and pipes, the joints are guaranteed to fit perfectly and maintain their dimensional accuracy.

TIFAS® blind rivets are especially suitable for thin-walled components and for effective installation from one side.

TIFAS® blind rivets are highly versatile and can fasten profiles, pipes, tanks and much more besides. Standard blind rivets come in a wide selection of material combinations, head shapes and grip lengths. Low in cost, standard blind rivets are quickly installed and fasten tightly and securely. The stainless steel version is also very corrosion resistant. Also available in A4 stainless steel.

## Installation steps

1. Place the blind rivet with mandrel into the installation tool and insert into the drilled hole.
2. On triggering the installation tool, the jaws take hold of the mandrel and pull. At the same time, the mandrel head swages the end of the shank on the sleeve. The rivet is installed when the mandrel head is at the same height as the surface layer of the component.
3. A surge of force is applied at this point, causing the mandrel to snap off when it reaches its set breaking point.

## Coloured plastic caps

Plastic caps in an array of RAL colours can be supplied for the TIFAS® blind rivet line. TIFAS® blind rivets can also be supplied painted in the desired RAL colour.

## General building control approval

Some dimensions are available with general building control approval No. Z-14.1-4.

## Bespoke versions

TIFAS® blind rivets can be modified depending on the customer's requirements. In these cases, the geometric parameters will be changed and, depending on the version, also the surface finish.

## Benefits at a glance

- Universal use
- Fastens various materials such as metals and plastics
- Quick and secure installation
- Permanent secure fixing
- Heatless installation means component will not warp.
- Eliminates extensive refinishing
- Ideal for lightweight constructions.

## Sample applications:

- General industry
- Automotive industry
- Construction industry
- Bodywork and vehicle manufacture
